Scissor lift tables

For partially concentrated loads

Lift table for partially concentrated loads

Ref. 61.0

- Particularly suitable for industrial applications, being used as part of production processes in the mechanical engineering industry, woodworking engineering, etc.
- Allowable loads: partially concentrated.
- Top surface: smooth sheet metal.
- Cycles / hour allowed: 30 cycles per hour, in a shift of 8 hours per day.
- Single-acting lifting cylinders with drainage.
- Lifting limit switch with microswitch.
- Self-lubricating bushes in the joints.
- Internal electro-hydraulic control unit with maximum pressure valve to avoid overloads, flow compensation valve to control the lowering speed.
- The electrical equipment is electronically controlled, with transformer and thermal protection.

Model 1A	Capacity	Stroke	Dimensions	Min. height	Motor	
	kg	(E) mm.	(AxB) mm.	(H) mm.	kW	
610VBA110A01	1000	800	1400 x 800	300	1,1

Products from the VINCA Group

- Overhead cranes and gantry cranes
- Swing jib cranes
- Hoists and winches
- Scissor lift tables and platforms
- Loading platforms - forklifts (PLT)
- Adjustable - automatic docks and ramps
- Mobile ramps (RMC)
- Dock shelters
- Vehicle immobilizers WHEEL-LOK
- Dock safety equipment
- Mobile elevators
- VACU-LIFT suction systems
- TROMPEX vacuum manipulators
- Weightless manipulators
- Pallet inverter INVERTER
- Levelers NIVELMATIC
- Tilters INCLINATOR
- Tumblers
- SKIPS for transfers
- Tankettes for moving large loads
- Elevators for working at height
- Industrial fans HVLS
- Flexible doors, high-speed doors, refrigerated doors
- Sectional doors
- Fire doors
- Gates and closures
- DOK-GUARDIAN safety barriers
- Material for electrification in mobile equipment
- Below-the-hook accessories
- Radio controls
- Post-sale service
- TRANSFER car
- Optional: ATEX equipment finish
