Reinforced Safety Trestle Trailer Jack

TM/RE40

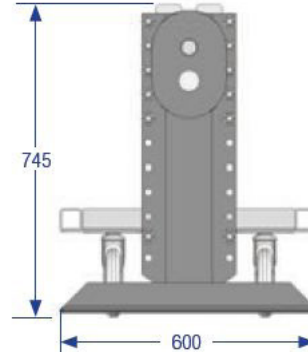

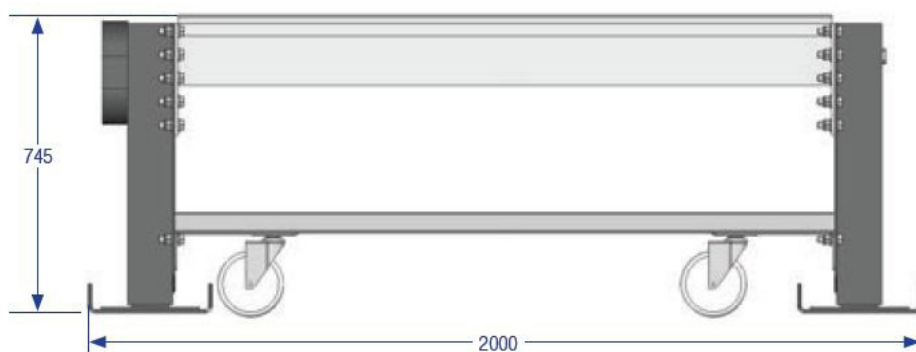

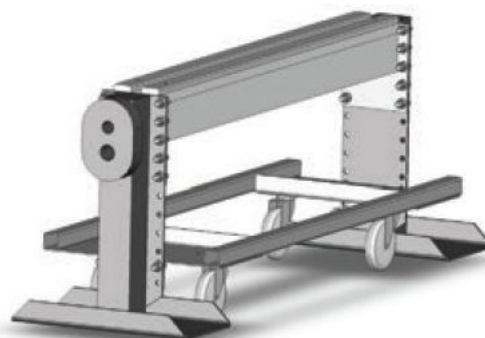

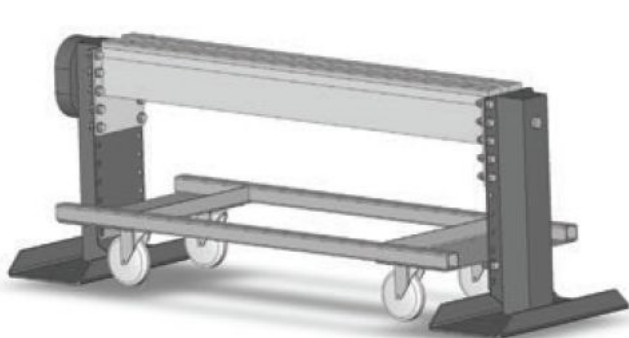

Designed to keep trailers using air suspension from tipping. Height adjustable by using telescopic crank stands.

This reinforced trestle allows to ensure staff security during transhipment of the trailers fitted with pneumatic air suspension when uncoupled from the truck tractor.

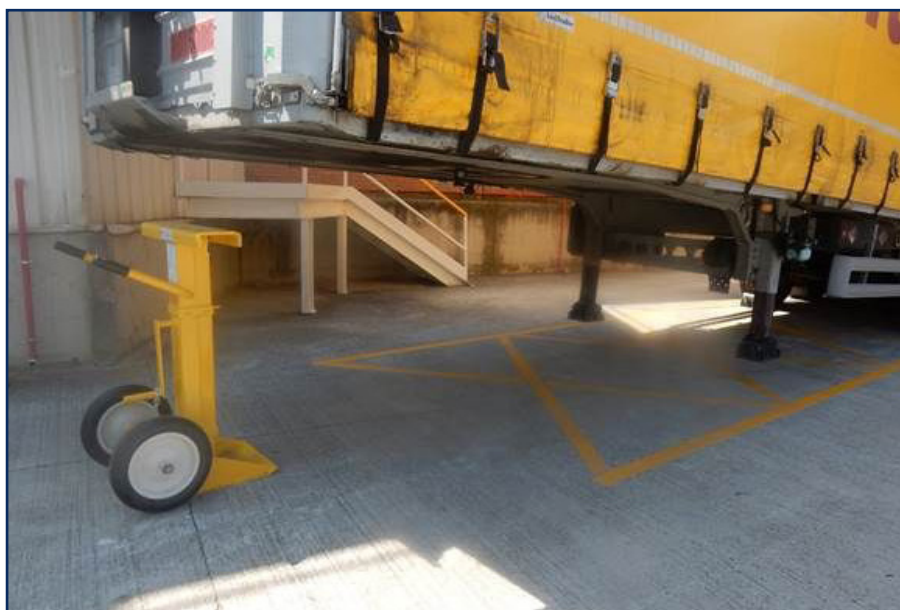

Perfectly balanced, this trestle remains horizontal during the installation. The height adjustment of the chassis is quick and accurate, allowing to minimize the space between the bottom of the trailer and the mobile security trestle. Very resistant, treated hardwood on top of the trestle

Technical Information:

- Length: 2.000 mm
- Usable length: 1.584 mm
- Width: 600 mm
- Adjustable height: from 745 to 1.060 mm
- Load capacity: 25 tn
- Wheel diameter: 160 mm
- Weight: 213 kg
